

# JPMorgan China Income Fund

August | 2017

Morningstar Overall Ratings™

## Important information

1. The Fund invests at least 70% in (a) equity securities of companies which are based in, listed on any stock exchange of, or operate principally in the PRC and that the Investment Manager expects to pay dividends and (b) Chinese debt securities issued and/or distributed in or outside the PRC.
2. The Fund is therefore exposed to risks related to debt securities, emerging markets, liquidity, PRC tax, equity, valuation, credit, dynamic asset allocation strategy, investment grade bond, below investment grade/unrated investment, "Dim Sum" bond, class currency and currency hedged classes. The Fund has exposure to PRC securities (including PRC exchange traded stock index futures) via a QFII license and/or the Shanghai-Hong Kong Stock Connect. Investors will be subject to the associated QFII, China market, PRC exchange traded stock index futures, PRC brokerage, RMB currency, Shanghai-Hong Kong Stock Connect and diversification risks. RMB is currently not freely convertible and RMB convertibility from offshore RMB (CNH) to onshore RMB (CNY) is a managed currency process subject to foreign exchange control policies of and restrictions imposed by the Chinese government. There can be no assurance that RMB will not be subject to devaluation at some point.
3. Where the income generated by the Fund is insufficient to pay a distribution as the Fund declares, the Manager may at its discretion determine such distributions may be paid from capital including realised and unrealised capital gains. Investors should note that the payment of distributions out of capital represents a return or withdrawal of part of the amount they originally invested or from any capital gains attributable to that original investment. Any payments of distributions by the Fund may result in an immediate decrease in the net asset value per unit.
4. Investors may be subject to substantial losses.
5. Investors should not solely rely on this document to make any investment decision.

## WHY JPMORGAN CHINA INCOME FUND?

### 1. Various income sources for competitive yield

The Fund is designed to capture the wide income opportunity set in the China space by investing in onshore equities (CNY), offshore equities (HKD), onshore bonds (CNY), offshore CNH bonds and offshore USD bonds.

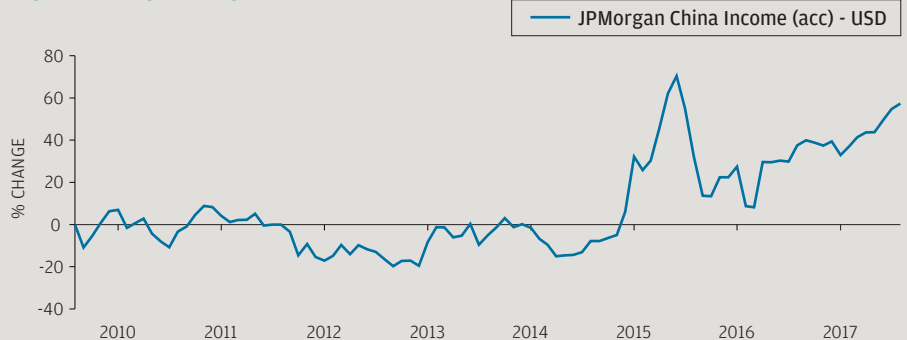

### 2. Flexible asset allocation

Given the flexibility of the Fund in its equity and bond exposure, asset allocation of the Fund is mutually determined by our equity and fixed income teams.

### 3. Fully capture income potential across sectors

Being able to invest in the China onshore and offshore stock markets means a wider catchment in the dividend universe, where the yield dynamics varies from one sector to another. In the fixed income space, the onshore and offshore markets present a diverse range of opportunities for income investing.

## HISTORICAL DISTRIBUTIONS

Ex-dividend date (d/m/y)	Distribution per unit / Annualised yield <sup>*□</sup>	
	USD (mth) Class	HKD (mth) Class
30.06.2017	USD 0.0340 3.90%	HKD 0.0340 3.87%
31.07.2017	USD 0.0340 3.84%	HKD 0.0340 3.82%

<sup>\*</sup> Aim at monthly distribution. Dividend rate is not guaranteed. Distributions may be paid from capital. Refer to important information 3

<sup>□</sup> Positive distribution yield does not imply positive return. Annualised yield =  $[(1 + \text{distribution per unit/ex-dividend NAV})^{12}] - 1$ . The annualised dividend yield is calculated based on the monthly dividend distribution with dividend reinvested, and may be higher or lower than the actual annual dividend yield.
